

UNWAVERING SUPPORT

improving our customers' mission readiness

OUR MISSION

is to provide the customer with consulting and logistics services through persistence, without exception. We vow to keep the end goal insight, despite any obstacles that may arise.

Formed in 2017, Valiant strives to bring increased focus to an area that can be easily neglected—logistics. Our intent is to improve our customers' mission readiness by providing unwavering support and implementing policies and procedures that are efficient and effective. As contributors to various Integrated Product Teams (IPT) and Integrated Logistics Support (ILS) teams, we understand the importance and significance of logistics/supply chain management and how these services may impact and determine the success or failure of a project.

With Valiant's experience and emphasis in these core areas, our customers will be more prepared to achieve success and meet their goals.

OUR SERVICES

INVENTORY MANAGEMENT

The effective management of inventory should be a primary objective when a company is searching for ways to manage costs and improve profitability. Managing the number of units on hand, the amount of capital being utilized, and the rate at which products are delivered to the end user are all factors that impact cash-flow. Valiant can provide support in the following areas:

- **Inventory & Audits** - Conduct full-scale inventories and/or periodic audits.
- **Consulting** - Analyze current flow of goods and recommend improvements to better manage the control and flow of products.

SUPPORT SERVICES

Other functions that Valiant specializes in that can support your business growth, include:

- **Bookkeeping** - Monthly, quarterly, yearly balance sheet and income statement preparation. Bank reconciliations and journal entries. Tracking of daily transactions.
- **Data Entry** - Inputting of information into customer databases, excel templates, or analyzing customer data to produce predefined metrics.
- **Market Research** - Gathering, analyzing, and interpreting information about target markets, products, and services.

PROCUREMENT

Most companies spend too much time or too many resources managing the buying of goods and services. There is the potential for a company to cut costs or improve operations by making adjustments to their procurement cycle. Valiant has the experience and can provide support in the following areas:

- **Supplier Identification** - Source, evaluate, and select vendors based on quality, quantity, time, price, and location.
- **Purchasing** - Initiate requests for quotations; submit purchase orders for products and/or services.
- **Expediting** - Contact vendors to identify whether or not purchase orders have deviated from projector customer schedules.
- **Receipt and Inspection** - Receive and inspect deliveries; verify accuracy and consistency on packing slips and purchase orders.

LOGISTICS CONSULTING

When a company lacks the knowledge or experience in an area, they may seek consultation from industry-specific specialists. At Valiant, we will assess a company's current operations and recommend improvements that will increase their effectiveness and efficiency.

- **Policies & Procedures** - Review, analyze, improve, implement methods to increase effectiveness and profitability of a company's supply chain.
